

APPLICATION MECHANICAL I

KOMPAS 3D

Equipment: Steel structures - an application for KOMPAS-3D, designed to automate the design of structures from shaped metal rolling. The application allows you to quickly design all kinds of frames and frames, automatically create a set of documentation.

REQUIRES FOR WORK: KOMPAS-3D

MANUFACTURER: LLC "ASKON-
DESIGN SYSTEMS"

Equipment: Piping is a specialized application of the KOMPAS-3D system intended for the rapid design of hydraulic and pneumatic systems, various utilities, piping of machines and equipment, automatic creation of a set of documentation for the manufacture of pipelines.

REQUIRES FOR WORK: KOMPAS-3D

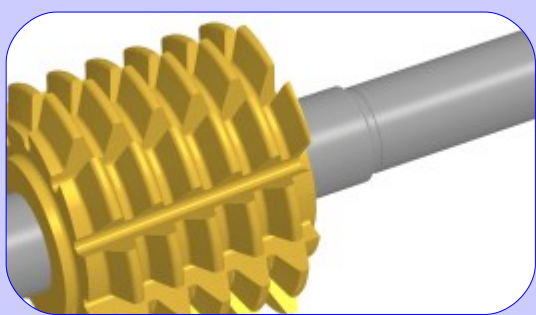

MANUFACTURER: LLC "ASKON-
DESIGN SYSTEMS"

The application is designed to automate the design and construction of three-dimensional models of shafts, bushings, mechanical transmission elements and various structural elements in the KOMPAS-3D environment.

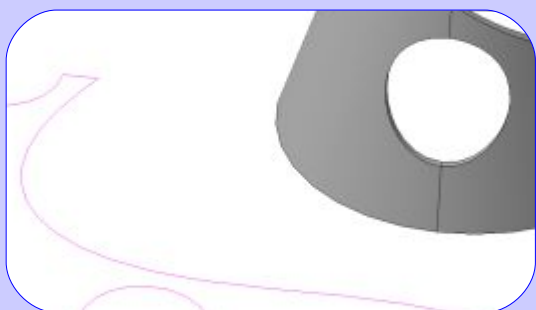

REQUIRES FOR WORK: KOMPAS-3D

MANUFACTURER: LLC "ASKON-
DESIGN SYSTEMS"

Shafts and mechanical transmissions 3D. Gear cutting tool
A specialized module for the basic application - Shafts and mechanical transmissions 3D. Designed for the design of gear cutting tools.

REQUIRES FOR WORK: KOMPAS-3D
, SHAFTS AND MECHANICAL
TRANSMISSIONS 3D
MANUFACTURER: ASKON-DESIGN
SYSTEMS LLC

Equipment: Sweep
Application for quick design of elements of dust, gas and air ducts, pipelines and similar parts from sheet material.

REQUIRES FOR WORK: KOMPAS-3D

MANUFACTURER: LLC "ASKON-
DESIGN SYSTEMS"

Mechanics: Springs
The application allows you to perform design and verification calculations of compression, tension, torsion springs, as well as Belleville, conical and shaped springs. Based on the calculation results, drawings and 3D models are automatically generated.

REQUIRES FOR WORK: KOMPAS-3D

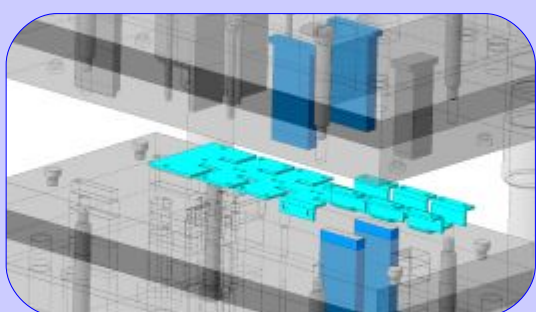

MANUFACTURER: LLC "ASKON-
DESIGN SYSTEMS"

Catalog: Welded seams
A set of applications for quick design of an electronic product model containing welded joints.

REQUIRES FOR WORK: KOMPAS-3D

MANUFACTURER: LLC "ASKON-
DESIGN SYSTEMS"

3D stamps
The 3D Stamps application is designed to automate design and technological work in the design of dies for products from sheet material. Allows you to form a set of technical documentation required for the release of a stamp.

REQUIRES FOR WORK: KOMPAS-3D

MANUFACTURER: LLC "ASKON-
DESIGN SYSTEMS"
