

APPLICATION MECHANICAL III

KOMPAS 3D

APM FEM

The APM FEM application is designed to perform express calculations of solid objects in the KOMPAS-3D system, and visualize the results of these calculations.

APM FEM. Topological optimization

Application for optimizing material distribution in the design area, taking into account loads and restraints. Consists of two parts: APM FEM. Topological optimization. Additional module and Surface smoothing procedure.

KompasFlow

The application is intended for carrying out in KOMPAS-3D express analysis of the aerohydrodynamics of the designed product.

IOSO-K optimization

Application for optimizing the geometry of parts and assemblies in KOMPAS-3D. Parameterization makes it possible to consider several product options in one model. This is one of the benefits of 3D modeling. The question is which option to choose?

Universal Express Mechanism

The application is intended for express analysis of dynamic, kinematic and static systems designed in KOMPAS-3D.

KOMPAS-Expert

Application for searching and correcting errors in KOMPAS-3D documents. KOMPAS-Expert checks models, drawings and specifications drawn up in KOMPAS-3D, giving the designer the opportunity to correct them before the documentation goes into production.

Artisan Rendering, a photorealistic rendering system for KOMPAS-3D

What will a product or structure look like if the design has not been completed yet? Finding out this is not only interesting -

CNC module. Turning

CNC module. Turning is the first CAM application fully integrated into the KOMPAS-3D 3D modeling system. The application is designed to automate the development of control programs for CNC lathes (2-axis turning).

REQUIRES FOR WORK: KOMPAS-3D
MANUFACTURER: SCIENTIFIC AND
TECHNICAL CENTER "COMPUTER-
AIDED DESIGN OF MACHINES"

REQUIRES FOR WORK: KOMPAS-3D
, APM FEM
MANUFACTURER: ASKON-DESIGN
SYSTEMS LLC , STC APM

REQUIRES FOR WORK: KOMPAS-3D
MANUFACTURER: TESIS

REQUIRES FOR WORK: KOMPAS-3D
MANUFACTURER: SIGMA
TECHNOLOGY

REQUIRES FOR WORK: KOMPAS-3D
MANUFACTURER: LABORATORY OF
COMPUTATIONAL MECHANICS

REQUIRES FOR WORK: KOMPAS-3D
MANUFACTURER: LLC "ASKON-
DESIGN SYSTEMS"

CURRENT VERSION: V1
REQUIRES: KOMPAS-3D
MANUFACTURER: PICTOREX
LIMITED

REQUIRES: KOMPAS-3D
MANUFACTURER: NATIONAL
RESEARCH MORDOVIAN STATE
UNIVERSITY NAMED AFTER N.P.
OGAREV
