

APPLICATION CONSTRUCTION III

KOMPAS 3D

Catalog: SKS

The catalog is intended for the automated design of structured cabling systems (SCS) of buildings and structures.

Catalog: OPS

The catalog is intended for computer-aided design of security and fire alarm systems (FSA) of buildings and structures.

Catalog: General layout and landscape

The catalog is intended for the execution of design documentation of the "General plan" section in accordance with the requirements of GOST.

Evacuation plan

The catalog is intended for the development and execution of evacuation plans in accordance with the requirements of GOST R 12.2.143-2002.

Catalog: Construction machines

The catalog is intended for the formation of graphic, text and tabular documents necessary for the development of projects for the organization of construction and production of work (POS and PPR).

Catalog: POS and PPR

The catalog automates the development of drawings for the sections "Construction organization design" (POS) and "Work production design" (PPR).

KOMPAS-Electric

Today, hundreds of enterprises in Russia and neighboring countries successfully design electrical equipment using the KOMPAS-Electric system. There are two variants of the system: KOMPAS-Electric and KOMPAS-Electric Express.

KOMPAS-Electric Express

KOMPAS-Electric Express is intended for users who are engaged in the development of circuit diagrams and lists of elements for them. This option is significantly simplified in relation to KOMPAS-Electric.
